

IMS 08 11 10

1.3.3 QUALITY POLICY

Control Logic is a 100% Australian, family owned business. We aim to be a trusted market leading supplier in our industry by:

- Meeting customer requirements;
- Providing exceptional customer service and the best possible customer support;
- Providing quality products;
- Being easy to deal with; and
- Continual improvement of our IMS (Integrated Management System).

1.3.4 SAFETY AND ENVIRONMENTAL POLICY

WORKPLACE HEALTH AND SAFETY MANAGEMENT

It is our aim to ensure the workplace health and safety of all staff and management while they are working for Control Logic.

We encourage and expect all staff and management to support us in this aim (and obligation), not simply because it is legislation, but it is in the interests of all people to return home each day safe and free from injury and illness.

In order to achieve our aim, we will provide a safe working environment that still allows us to effectively meet customer requirements.

We are committed to establishing measurable objectives and targets to ensure continual improvement aimed at elimination of work-related injury and illness (See section 1.4 of the IMS).

We are committed to complying with the relevant WH&S legislation including Act, Regulations, as well as the relevant Codes of Practice and all other relevant requirements incumbent upon our company.

We are committed to providing all the necessary support and management to meet our aim and commitments including providing appropriate safe equipment, personal protective equipment, safety training, etc.

We also expect that staff and management will get involved in health and safety management, and expect staff to report hazards and incidents as soon as possible to help prevent injury and illness.

ENVIRONMENTAL MANAGEMENT

We are committed to minimising our impact on the environment including the prevention of pollution.

As with workplace health and safety, we are committed to complying with the relevant EPA and Council's environmental legislation along with all other relevant requirements incumbent upon our company.

We are committed to recycling and / or reusing product so that we can reduce the impact on natural resources, with a preference for recyclable materials where these are available

We are committed to continual improvement of our IMS.
